

DATO IL SEGUENTE CIRCUITO

(10)

DATI

$$R_1 = 5 \text{ k}\Omega$$

$$R_2 = 5 \text{ k}\Omega$$

$$R_3 = 10 \text{ k}\Omega$$

$$E_1 = 5 \text{ V}$$

DETERMINARE:

la grandezza I_3

$$V = R \times I$$

$$5 = 10 \times I_3$$

The four seasons are spring, summer, fall, and winter, and although various areas of the United States experience drastically different weather during these times, all portions of the country recognize the seasons; winter in California may bring heat, and winter in New York may bring blizzards, but both periods are nevertheless winter.
